📍 Kakinada, AP, India 📞 +91 9989216769 ✉ Gmail 🔗 LinkedIn 🐙 GitHub 🌐 Portfolio

PROFESSIONAL OBJECTIVE

Aspiring technology professional with hands-on experience in building Full Stack applications and Machine Learning systems. Proficient in Java and Python, I utilize Node.js and Express.js to architect scalable backends for high-performance solutions. I am actively seeking opportunities to apply my technical expertise and passion for developing innovative solutions in an impactful, technology-driven environment.

SKILLS

Programming Languages	Python, SQL, Java
Web Technologies	HTML, CSS, Javascript
Core CS Concepts	Data Structures & Algorithms, OOP, DBMS, SDLC
Frameworks/Libraries	React.js, Node.js, Express.js
Database	MySQL, MongoDB
Developer Tools	Git, Github, Google Colab, VS Code
Soft Skills	Communication Skills, Problem Solving, Team Collaboration, Attention to Detail and Self-Motivated

INTERNSHIP EXPERIENCE

SOFTWARE DEVELOPMENT INTERN

April 2025 - June 2025

Bluestock — Remote

- Engineered a full-stack IPO Portal using MERN Stack for Bluestock, enabling customer acquisition by listing real-time upcoming and ongoing IPO details.
- Displayed key IPO metrics including subscription dates, price bands, lot sizes, and official documents to support user-driven investment decisions.
- Designed and deployed an Admin Dashboard for complete CRUD operations — managing IPO additions, updates, and record control via a secure interface.
- Integrated RESTful APIs and MongoDB collections to ensure smooth data flow between admin operations and the customer-facing interface.

PROJECTS

Skin Disease Prediction by Lesions

March 2026 – May 2026

Full Stack + Machine Learning — React.js, NodeJS, ExpressJS, Python, MySQL

- **End-to-End System Development:** Built an intelligent application integrating Python-based ML models with a React.js frontend and MySQL database for seamless data flow.
- **API & Integration:** Designed and implemented backend inference APIs to enable efficient communication between the machine learning model and user interface.
- **Performance Optimization:** Optimized API handling and inference pipeline, achieving response times under 2 seconds for faster predictions.
- **Reliability & Scalability:** Enhanced system stability through debugging, error handling, and performance tuning while applying scalable design principles.
- **Model Deployment & Integration:** Deployed and integrated trained machine learning models into the production pipeline, enabling real-time predictions and seamless interaction within the full-stack application.

Cryptocurrency Portfolio Dashboard

October 2025 – December 2025

MERN Stack — React.js, Node.js, Express.js, MongoDB

- Developed a real-time Cryptocurrency Portfolio Tracker using MERN Stack, delivering a responsive and interactive UI with dynamic updates for seamless user experience across devices.
- Engineered secure RESTful APIs using Express.js and Node.js supporting user authentication, portfolio CRUD operations, and personalized watchlist management.
- Consumed live third-party cryptocurrency APIs to render real-time market data — including prices, volume, and market trends — for over 10,000+ digital assets.
- Deployed a production-ready dashboard featuring a mobile-first responsive design for a consistent cross-device experience.

E-Ration Shop Management System

July 2025 – August 2025

Full Stack — React.js, Node.js, Express.js, MySQL

- Built a backend-driven Ration Shop Management Platform using MERN-style stack with MySQL, digitizing stock tracking, beneficiary management, and ration transaction workflows.
- Engineered JWT-based authentication and role-based access control via Express.js APIs, securing platform operations for admins, shop owners, and end users.
- Delivered a responsive React.js frontend integrated with a robust Node.js backend, following modular architecture and structured SDLC practices for reliable deployment.

CERTIFICATIONS

- Java Programming – NPTEL
Jan–Apr 2025 (12-week course) — **Elite silver Certification Achieved with 84%**
- Python Foundation – Infosys SpringBoard
Issued on March 1, 2025 — **Scored 87.5%**
- SQL Programming - LinkedIn Learning
Issued on May 31, 2026 - **Scored 94%**
- Data Structures and Algorithms using Java – Infosys SpringBoard
Issued on April 19, 2026 — **Scored 88%**

EDUCATION

Vignan's Lara Institute Of Technology & Sciences

2022 – 2026

B.Tech in Computer Science & Engineering — CGPA: 8.2 — Andhra Pradesh, India

Sri Chaitanya Junior College

2020 – 2022

MPC — Percentage: 91% — Andhra Pradesh, India

Sri Chaitanya School

2019 – 2020

SSC — Percentage: 99% — Andhra Pradesh, India

ACHIEVEMENTS

- **Runner-Up, CodeFusion Hackathon:** Secured 2nd place by delivering a data-driven solution under time constraints, applying Python and SQL to analyze datasets and present actionable insights. Recognized for strong analytical thinking, problem-solving, and collaboration.
- **GFG Local Chapter:** Currently serving as Social Media Lead, promoting coding events, engaging with other colleges, and strengthening tech community outreach.
