Place: Kakinada, Andhra Pradesh-533005

PROFESSIONAL SUMMARY

Aspiring Associate Software Engineer with strong proficiency in Java, JavaScript, and Python, and a solid foundation in data structures, algorithms, and object-oriented programming. Hands-on experience in software development life cycle (SDLC), designing RESTful backend services, and working with software systems. Skilled in adapting to new technologies, with exposure to information technology domains including backend development and database management. Strong focus on security, scalability, and structured problem-solving with effective team collaboration.

EDUCATION

- Vignan Lara Institute Of Technology & Sciences** Andhra Pradesh, India
• Bachelor of Technology - Computer Science and Engineering; GPA: 7.9 2022 – 2026
- Sri Chaitanya Junior College** Andhra Pradesh, India
• MPC; Percentage: 91 2021 – 2022
- Sri Chaitanya School** Andhra Pradesh, India
• SSC; Percentage: 99 2020 – 2021

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Web Technologies:** HTML, CSS, Javascript
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Software Development Life Cycle (SDLC), Programming Concepts, Software Systems
- **Frameworks & Libraries:** Node.js, Express.js, React.js
- **Databases:** MongoDB (Mongoose), MySQL
- **Tools & Version Control:** Github, Google Colab, VS Code, Git
- **Operating Systems & Environments:** Familiarity with Linux / Unix environments
- **Soft Skills:** Strong Communication Skills, Problem Solving, Team Collaboration, Detail-Oriented, Self-Motivated

PROFESSIONAL EXPERIENCE

- Bluestock Fintech** Apr 2025 – Jun 2025
• Software Development Intern Remote
 - Developed backend-supported features using **Node.js and JavaScript**, ensuring reliable client-server communication.
 - Designed and consumed **RESTful APIs** with proper validation, error handling, and edge-case management.
 - Improved **system reliability** by debugging API failures and ensuring consistent data flow.
 - Collaborated using **Git-based workflows** and contributed to internal technical documentation.
 - Applied **structured problem-solving** to analyze logs and unexpected API behavior.
- SmartBridge** Jul 2024 – Sep 2024
• Full Stack Developer Remote
 - Implemented **RESTful backend services** using Node.js and Express.js.
 - Designed and managed **NoSQL database schemas** using MongoDB with validation and indexing.
 - Optimized database queries to support **scalable features** such as filtering and pagination.
 - Worked closely with frontend teams to ensure **smooth API integration** and consistent responses.
 - Followed **clean coding and OOP principles** while building modular services.

PROJECTS

- Cryptocurrency Portfolio Dashboard** Jan 2026 – Present
• MERN Stack — React.js, Node.js, Express.js, MongoDB
 - Built a **full-stack application** using React, Node.js, Express, and MongoDB.
 - Designed **RESTful APIs** to handle portfolio data, watchlists, and authentication workflows.
 - Integrated **live market data for 10,000+ assets** using third-party APIs.
 - Implemented **JWT-based authentication** for secure user access.
 - Deployed the application using **Vercel**, ensuring reliable availability and performance.
 - Focused on **modular design, scalability, and maintainability**.

- **Skin Disease Prediction by Lesions** Aug 2025 – Oct 2025
 - Full Stack + Machine Learning — React.js, Python, MySQL
 - Developed an **end-to-end system** integrating Python-based ML models with backend services.
 - Connected backend **inference APIs** with a React frontend.
 - Optimized request handling to achieve **sub-2-second response times**.
 - Applied debugging and performance analysis techniques to improve system behavior.
- **E-Ration Shop Management System** May 2025 – Jul 2025
 - Full Stack — React.js, Node.js, Express.js, MySQL
 - Built a backend-driven platform with **authentication, inventory management, and transactions**.
 - Designed and implemented a **normalized SQL database schema**.
 - Developed **secure REST APIs** for CRUD operations.
 - Ensured **data consistency and reliable backend behavior**.
 - Followed **SDLC principles** from design to deployment while ensuring application security and performance.
- **WanderWise Travel Assistant** Feb 2025 – Apr 2025
 - Frontend + API Integration — HTML, CSS, JavaScript
 - Built a **responsive web application** using HTML, CSS, and JavaScript.
 - Integrated **external REST APIs** for weather and environmental data.
 - Improved performance through **optimized client-side logic**.

CERTIFICATIONS

- Java Programming – NPTEL
- Python Programming – Infosys Springboard
- Software Engineer – HackerRank
- Introduction to Cybersecurity – Cisco Networking Academy

ACHIEVEMENTS

- **Qualified TCS CodeVita (Round 1):** Strengthened data structures and algorithmic problem-solving skills.
- **Participant, CodeFusion 24-Hour Hackathon:** Hands-on experience in rapid development and teamwork.
- **Participant, Technical Competitions:** Applied logical thinking and structured problem solving.
